Peggy Johnson, an engineer who is now Microsoft's executive vice president of business development, didn't know what being an engineer looked like - until she got to college. She began college as a business major. She was a freshman, doing a job delivering campus mail, when she took some packages to the engineering department - and everything changed.

I personally find Microsoft TechNet to be most useful. It's an online resource for IT professionals that's full of information. The web service offers training and there is a large library and wiki. I particularly like using the forums when I encounter real tough issues. Other professionals are willing to teach you how to solve the problem, or at the very least, direct you to a site or place ...
